NOTICE OF PUBLIC MEETING

Stakeholder Review and Comment

San Luis Obispo County Regional Airport

Draft Rules and Regulations & Draft Minimum Standards

The County of San Luis Obispo (County) and Aviation Management Consulting Group (AMCG) are in the process of developing/updating the Rules and Regulations and Minimum Standards for the San Luis Obispo County Regional Airport (Airport). These two documents are components of the Airport's Primary Management Compliance Documents (PMCDs).

The County is seeking stakeholder review and comment on the draft Rules and Regulations and Minimum Standards.

A hybrid stakeholder engagement meeting to discuss this matter will take place on:

- Date: Wednesday May 25th 2022 at 10:00am
- Location: San Luis Obispo County Regional Airport, 975 Airport Drive, Ste. 1
- Virtual Link: Microsoft Teams
- RSVP: Please RSVP to: cpene@co.slo.ca.us

The purpose of the meeting is to review and discuss the development of the draft Rules and Regulations and Minimum Standards and the role of stakeholders in the process.

The draft documents will be made available for stakeholder review and comment beginning **Wednesday, June 1st 2022** through **Friday, July 1st 2022**.

You are highly encouraged to attend this very important meeting and become actively engaged in the development of these very important documents.

Background

PMCDs are a comprised of rules, regulations, policies, and standards that govern the operation, management, and development of an airport. In combination, PMCDs are designed to: (1) contribute to the long-term financial health of an airport, (2) facilitate (foster) the orderly development of an airport, (3) encourage the provision of quality products, services, and facilities at an airport, (4) protect the health, safety, interest, and general welfare of the public, and (5) reduce the potential for conflict with tenants, consumers, and users.

- Rules and regulations set forth the rules and regulations for the safe, orderly, and efficient use of an airport. Their role/purpose is to protect the public health, safety, interest, and welfare on the airport and apply to all persons using the airport – at all times – for any purpose.
- Minimum standards set forth the requirements that need to be met by entities to engage commercial aeronautical activities at an airport. Their role/purpose is to establish a consistent threshold requirement which levels the playing field and promotes fair competition among operators. Minimum Standards apply to entities who want to engage in commercial aeronautical activities at an airport.

Within this context, it is the desire of the County to:

- 1) ensure the safe, orderly, and efficient operation and use of the Airport,
- 2) protect the public health, safety, interest, and general welfare of the commercial operators, tenants, permittees, and users of the Airport.

Beyond being consistent with FAA policies and directives, the County believes that these objectives are consistent with best management (and customer service) practices. It is not the desire or the intent of the Authority to create an undue burden on existing or future operators, tenants, consumers, or users of the Airport.

As such, the County and AMCG have prepared draft Rules and Regulations and Minimum Standards that are: (1) relevant to the current (and/or anticipated) activities at the Airport, (2) reasonable and appropriate for the Airport and the market, and (3) protects the public health, safety, interest, and general welfare of all users of the Airport.
